Declaration on Conflict Minerals

Dear Sir or Madam,

Regulation (EU) 2017/821 of the European Parliament and of the Council of 17 May 2017 establishing supply chain due diligence obligations for the import of **tin, tantalum, tungsten**, their ores and **gold** from conflict and high risk areas sets out the requirements for importers of minerals and metals.

Aladin AG does not import any minerals or metals listed in EU-2017/821 Annex I, but rather processed bronze alloy products. There are no specific regulations for the processing industry in EU-2017/281. The alloys for plain bearings (e.g. Sintered Bronze A-51) contain tin as an alloy component.

Aladin AG fulfils its obligations with regard to the supply chain. We have asked our suppliers to provide proof of compliance, according to which minerals are only procured from smelters and refiners that demonstrably comply with the requirements of EU Regulation 2017/821. This is to ensure that no substances from any of the conflict countries listed by the EU are contained in the raw materials for plain bearings.

As far as we know, there is no evidence of incorrect information from our suppliers, but regardless, we cannot accept any liability for the correctness of the information they provide.

Please do not hesitate to contact us for further information.

Aladin AG

Wattwil, 17.02.2023/MH
